

THE LEGENDARY DURABILITY OF ARCTIC STEEL.

Built for medium- to full-size lighter vehicles, the **Arctic SD-S** has been the heart of the line for years. The blade is constructed of 10 gauge hot-rolled steel and is reinforced with five integrated vertical ribs for tremendous structural strength. The snow roll blade design not only reduces wear and increases fuel efficiency, it also prevents over-the-top snow loss. Some call it fighting fire with fire. Arctic calls it fighting a cold, hard winter with cold hard steel.

5 STRUCTURALLY INTEGRATED REINFORCING RIBS
for enhanced structural strength

3 POWERFUL TENSION SPRINGS
support the blade and allow for blade tripping when heavier obstacles are in your path

THREE 3/4" OPEN PINS
secure the blade to the quadrant and A-frame assembly, eliminating pin seizure, and easing pin replacement

6" DEFLECTOR
keeps snow down on the blade and away from the driver's windshield

FULLY REVERSIBLE, HARDENED, HIGH CARBON STEEL CUTTING EDGE
lowers blade profile by exposing only 2" of blade at a time, and can be easily flipped when worn to start with a new edge

EXTRA-LARGE DISH-SHAPED SKID SHOES
improve surface clearance while plowing forward

10 GAUGE HOT-ROLLED STEEL
for timeless strength and durability

HOT-DIPPED GALVANIZED STEEL FRAME
provides added resistance to abrasion, water and rust, making our plows virtually maintenance free

STURDY REINFORCED ANGLE IRON A-FRAME AND QUADRANT ASSEMBLY
for sure connection to the undercarriage of the vehicle

TOUGHER THAN A CANADIAN WINTER

MEET THE REST OF THE ARCTIC STEEL LINE

ARCTIC HD

ARCTIC PLOW PARTNER

WHY CHOOSE STEEL?

Providing timeless performance and durability – Arctic's steel plow blades are constructed from 10 gauge hot-rolled steel, and are reinforced with integrated vertical ribs to form a single, tremendously strong structural unit. Blade curvature maximizes snow roll and handling, leading to reduced vehicle stress and improved fuel efficiency. All of Arctic's steel blades are dipped in galvanizing zinc coating for superior rust protection. **Legendary strength and time-proven results, contact your Arctic Dealer for full details.**

M673 HYDRAULIC POWER UNIT
Arctic's electric, hydraulic outfront pumps are designed specifically for the quick response required by snowplow applications. The M673 uses a low-amperage draw motor combined with a high-flow pump operating at 2200 psi to give the operator fast plow response with low battery drain.

QUIK*LINK® II AND III MOUNTING SYSTEMS
Featuring an adjustable jack stand, our mounting systems allow you to remove the entire plow assembly as a single unit with the lift frame intact. QUIK*LINK® II uses mounting pins on either side of the system to easily attach and detach the plow from your vehicle. Arctic's QUIK*LINK® III system makes the already-simple mounting system even easier to use by replacing the two mounting pins with a simple single locking bar.

ARCTIC SD-S SPECIFICATIONS

Plow Name	SD84-S	SD90-S
Length	84"	90"
Moldboard Height	27"	27"
Material (Steel)	10 Gauge Rolled	10 Gauge Rolled
Plowing Width (Full Angle)	73"	78"
Complete Weight	*591 lbs	*604 lbs
Mounting Type	Detachable	Detachable
Removable Lights and Power Unit	Yes	Yes

* Weight does not include undercarriage

STANDARD CONTROLLER

CONTROL BOX
Our standard control box, with two rocker switches – one for up and down, one for left and right – has proven to continue performing reliably over years of use.

OPTIONAL CONTROLLERS

TOUCHPAD
The touchpad responds instantly to the touch of a finger. Used handheld or mounted with a Velcro strip, it allows you to alter the plow's angle in the float position.

JOYSTICK
The joystick is mounted to the window opening in the driver-side door and allows you to alter the plow's angle in the float position.

MINI-JOYSTICK
This smaller version of the joystick is suitable for handheld use or can be mounted with a window bracket. It also allows you to alter the plow's angle in the float position.

HAND HELD
This ergonomic controller has 4 rubber-faced buttons, a float light in the middle and a curly cord. An automatic shut-off eliminates accidental use or drained batteries.

QUIK*LINK® is a registered trade-mark of Arctic Equipment Manufacturing Corporation.

LEGAL DISCLAIMER: Vehicles intended to be equipped with Arctic equipment must comply with the vehicle manufacturers' specifications for equipment application. Please consult your vehicle dealer before purchase and installation. The purchaser assumes all vehicle risk associated with the attachment and operation of Arctic equipment.
